

HIGH SPEED VAC SAW

MODEL KSV-32AM

- **Double Insulated**
can be used under most conditions.
- **Variable Speed**
adjust to suit material being cut.
- **Versatile**
for use with high speed steel or carbon grit saw blades.
- **Side Handle**
for perfect weight distribution and ease of handling.

The KSV-32AM Vac Saw effectively controls dust when cutting dry wall, plaster products, fiberglass and other hazardous dust producing materials. It features variable speed up to a high speed 2200 RPM, making it ideal for use with either high speed steel or carbide grit saw blades. The vacuum connection on the saw head will accept many standard hoses from the canister type or in-plant vacuum systems. Vacuum systems are not provided by Kett Tool.

The KSV-32AM is powered by a 115 volt AC, 4 amp double insulated motor. Accommodates 2" and 2½" diameter high speed steel saw blades and 2½"

carbide grit saw blades with cutting depths adjustable from zero to 5/8". Comes complete with three high speed steel blades and one tungsten carbide abrasive blade and adjustment wrenches.
